

Dear Parents/Guardians,

Carrollton Exempted Village Schools is focused on growing students academically and meeting each student's individual needs. In order to facilitate this growth in Mathematics, Carrollton Exempted Village Schools is utilizing Khan Academy, a free online mathematics program that works with your student's MAP RIT score to develop an individualized learning pathway.

Teachers may assign your student a class, username, and password. Students will be able to access Khan Academy in designated sessions at school and at home. We encourage you to support Khan Academy use at home as well as school. You can log in to Khan Academy at www.khanacademy.org.

Permission to utilize Khan Academy is covered by the district technology form. If you have any questions, or would prefer your student not to participate, please contact your building administrator.

Sincerely,

Stephanie Glasure
